

Urbanscape® Sedum-mix Blanket

October 2018

Description

The biodegradable Urbanscape® Sedum-mix blankets comprise eight to twelve different species of Sedum. The blankets boast at least 95% coverage upon delivery. The sebaceous sedum plants are adept at storing water in their leaves and are therefore extremely suitable for varying weather conditions. In accordance with FLL Guidelines for the Planning, Execution and Upkeep of Green-Roof Sites.

Installation

- Gently roll out the Urbanscape® Sedum-mix blanket crosswise onto the Urbanscape® Green Roll.
- Start with the flap at the top. Check the position of the blanket before rolling out.

- If necessary, the blanket can be cut to the right size by scissors or a hook cutter.
- The vegetation layer must cover the total area of Urbanscape® Green Roll. In case of installing gravel on the edges make sure that non

vegetation area is at least 20 cm from the edge of the green roof.

- Fertilize the vegetation layer with the nutrients 1 or 2 times a year.

Caution: Intensive and excessive walking on the plants (more than is normally required for maintenance) can damage the plants to such an extent that they cannot recover.

Technical Properties of Urbanscape® Sedum-mix Blanket

Property	Unit	Value	Standard
Thickness	mm	20-40	
Coverage	%	95%	
Standard size	m	1 × 1.2 (2 × 0,6)	
Max roll length	m	20-25	
Units	units/pallet	25	
Size	m ² /unit	1.2	
Size	m ² /pallet	max. 50 m ²	
Pallet size (L × W × H)	m	1.3 × 1.1 × 1.7	
Pallet weight	kg/pallet	1150	
Weight saturated	kg/m ²	23	
Weight dry	kg/m ²	15	

Urbanscape® Green Roof System Benefits

Complete solution

Lightness

Efficient installation

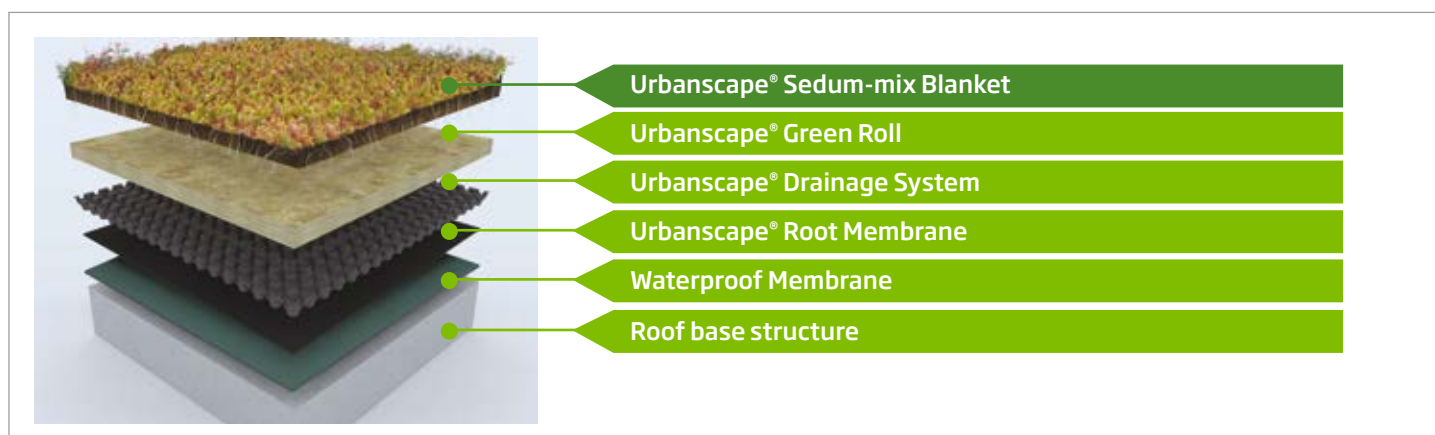

Sustainability

High water absorption

High thermal performance

High acoustic performance

High fire resistance
